ICRA has reaffirmed the long term rating on the Rs 16 crore term loans (enhanced from Rs 15 crore), the Rs 250 crore fund based limits and Rs 80 crore non-fund based facilities (reduced from Rs 110 crore) of Uttar Gujarat Vij Company Limited (UGVCL)<sup>1</sup> at [ICRA]A+ (pronounced ICRA A plus). The outlook on the long term rating is 'Stable'. ICRA has also reaffirmed the short term rating on the Rs 94 crore non-fund based limits of UGVCL at [ICRA]A1+ (pronounced as ICRA A one plus).

In arriving at the ratings, ICRA has taken a consolidated view of the state owned power sector utilities in Gujarat. The ratings continue to factor in the continuing profitable operations of the utilities supported by adequate tariffs and an operational fuel price and power purchase cost adjustment (FPPCA) framework, healthy cash collections and improving efficiency levels in distribution segment, which have been in line with regulatory targets. In addition, the leveraging level (Total Debt/TNW) of GUVNL on consolidated basis has improved to 1.14 times as on March 31, 2015 from 1.68 times as on March 31, 2012 supported by profitable operations, significant equity infusion by the State Government and satisfactory record of subsidy receipts.

The ratings are however constrained by the fact that despite an improvement, the large capital expenditure plans by the entities would imply continued reliance on debt; further the utilities are also exposed to refinancing risks to some extent. ICRA further notes that absolute subsidy dependence for the sector as a whole still remains high and has also increased in absolute terms, implying that timely receipts of subsidy from the State Government remains important. Moreover, actual release of subsidy (which is in line with budgetary provisions) has remained lower than the actual claims over the period which has led to a build-up of subsidy dues. While ICRA positively takes a note of additional subsidy allocations made to GUVNL by State Government in the revised budget estimates for FY 2014-15 and FY 2015-16 which has arrested the increase in pending subsidy dues to some extent, any delays or inadequacy in release of subsidy payments from GoG remains a key rating sensitivity. Also, the overall returns for GUVNL on consolidated basis continue to remain affected due to under-recoveries arising from lower efficiency levels in power generation segment as compared with normative targets set by the regulator. However, on a consolidated basis, while the utilities remain exposed to refinancing risks, ICRA takes comfort from the company's strong financial flexibility and also the fact that refinancing requirement has come down over the period.
