### Rationale

While arriving at the ratings, ICRA has taken a consolidated view of the credit profiles of Power Finance Corporation Ltd. (PFC) and REC Limited (REC), as REC is a subsidiary of PFC and both entities are in a similar line of business with strategic importance to the Government of India (GoI) and overlapping clientele.

The ratings continue to draw significant strength from PFC's sovereign ownership<sup>1</sup>, its importance to the GoI, given its important role as a nodal agency for various power sector schemes, and its dominant market position (including REC) in the power sector financing segment. The ratings also continue to draw comfort from PFC's healthy financial flexibility by virtue of its ownership and adequate profitability profile.

These strengths are partly offset by the company's exposure to a single sector (i.e. power) with a high concentration towards state power utilities as well as the vulnerability of its exposure to private sector borrowers (17% and 14% of the loan book as on December 31, 2019, at the standalone and consolidated level, respectively). This is reflected by the asset quality indicators with the stage 3 assets at 8.3% and 7.4% of total advances at the standalone and consolidated level, respectively, as of December 31, 2019.

<sup>1</sup> 56% held by the GoI as on December 31, 2019

ICRA notes that while PFC's capitalisation level was characterised by a comfortable Tier I capital of 15.95% as of December 31, 2018, the cushion over the regulatory levels declined with the Tier I capital at 11.7% as of March 31, 2019 post the acquisition of the Gol's stake in REC by PFC in March 2019. The acquisition impacted the company's capitalisation level as it had to knock off its investment (in excess of 10% of its net owned funds (NOF)) in REC from its NOF for capital adequacy calculations. Nevertheless, the capitalisation level remained above the regulatory threshold of 10% and is improving steadily, as also seen in 9M FY2020, with the Tier I improving to 14.37% as on December 31, 2019. Further, ICRA notes that the consolidated leverage increased (8.2 times as of December 31, 2019 compared to 6.9 times prior to the acquisition) and the consolidated solvency (Net Stage 3 Assets/Tier I Capital) was impacted by the aforesaid transaction and stood at 38% as on December 31, 2019 (43% as on September 30, 2019).

ICRA believes that prudent capitalisation is a key mitigant against the risks in PFC's portfolio arising out of the sectoral and credit concentration. A gradual and sustained improvement is expected in the consolidated solvency to a level comfortably below 40% with healthy internal capital generation, recoveries and no major incremental slippages over the medium term. Also, based on discussions with the managements and stakeholders of both entities, including the principal shareholder, ICRA understands that PFC and REC remain important vehicles for the implementation of the Gol's various power sector schemes, and support, if needed, will be forthcoming from the Gol. Support to REC, if required, will be extended by the Gol through PFC.

The Stable outlook reflects ICRA's expectation that PFC, along with REC, will remain strategically important to the Gol and will continue to play a major role in various power sector schemes of the Government. Consequently, PFC and REC are likely to retain a dominant position in power sector financing, while maintaining an adequate profitability, borrowing and capitalisation profile. With PFC and REC becoming a part of the same group, there could be some challenges in incremental fund-raising owing to the group exposure limits that the lenders might have. However, the impact of the same, if any, on a sustained basis, would only be visible over the medium term. Overall, PFC's ability to grow its loan book while maintaining adequate profitability and controlling credit costs would remain a monitorable.

## Key rating drivers and their description

### Credit strengths

**Majority ownership by Gol and strategic importance, given the role played in implementing various Gol schemes and dominant position in power sector financing** – Being nodal agencies for implementing various Gol schemes aimed at developing the country's power sector (such as Ultra Mega Power Projects (UMPPs) and the Integrated Power Development (IPD) Scheme), PFC and REC remain strategically important to the Gol for achieving its objective of augmenting power capacity across the country. Further, the Gol remains a majority shareholder in PFC, with a stake of ~56% as of December 31, 2019, and has representation on the company's board. Given the Gol's support, PFC has been able to raise funds at competitive rates. Precedents, wherein it received approval from the Gol to raise tax-free and 54EC low-cost capital gain bonds, provide comfort with respect to its financial flexibility, ability to raise low-cost funds, and maintain a diversified borrowing profile. Also, PFC has an experienced management team with the senior team having an experience of more than 30 years in power financing. Moreover, the company, along with REC, has maintained a dominant position in power sector financing with a large share of funding to state power utilities. ICRA notes that PFC's acquisition of REC further strengthened its position, while supporting better portfolio diversity, compared to individual entities. At the same time, with PFC and REC becoming a part of the same group, challenges in incremental fund-raising owing to the group exposure limits that the lenders might have, will remain a monitorable over the medium term.

**Adequate profitability profile** – Given the increased share of non-performing advances, PFC and REC's yield on loan assets moderated to the sub-10% range during the past three years compared to a level well over 10.5% in FY2017. The cost of funds, however, witnessed a lower decline during this period, leading to a decline in spreads. Consequently, the

net interest margins (NIMs) were lower at less than 3% during FY2018-9M FY2020 compared to a level close to 4% in FY2017. Nevertheless, the company's profitability remains adequate with a return on equity (RoE) of 12.4% and 17.3% at the standalone and consolidated level, respectively, in 9M FY2020. At the standalone level, PFC's five-year average RoA and RoE for FY2015-FY2019 stood at 2.0% and 15%, respectively. Also, while the sizeable investment in REC impacts PFC's standalone margins, the impact on profitability is likely to be partially offset by the profit in the form of the dividend declared by REC. Incrementally, PFC is likely to maintain a spread of 2.5-3% on its lending. ICRA, however, notes that PFC's credit costs could increase if there is a higher-than-expected haircut on the stressed private sector exposures or there are sizeable fresh slippages, thereby adversely impacting the profitability.

## Credit challenges

**Moderation of capitalisation level on REC acquisition** – The acquisition of REC impacted PFC's capitalisation level, given the requirement to knock off its investment (in excess of 10% of its NOF) in REC from its NOF for capital adequacy calculations. Thus, while PFC's capitalisation level was characterised by a comfortable Tier I capital of 15.95% as of December 31, 2018, the cushion reduced with the Tier I capital at 11.7% as of March 31, 2019. Nevertheless, the capitalisation level remained above the regulatory threshold of 10% and is improving steadily, as also seen in 9M FY2020, with the Tier I improving to 14.37% as on December 31, 2019. Further, ICRA notes that the consolidated leverage increased (8.2 times as of December 31, 2019 compared to 6.9 times prior to the acquisition) and the consolidated solvency (Net Stage 3 Assets/Tier I Capital) was impacted by the aforesaid transaction and stood at 38% as on December 31, 2019 (43% as on September 30, 2019).

ICRA believes that prudent capitalisation is a key mitigant against the risks in PFC's portfolio arising out of the sectoral and credit concentration. A gradual and sustained improvement is expected in the consolidated solvency to a level comfortably below 40% with healthy internal capital generation, recoveries and no major incremental slippages over the medium term. Also, based on discussions with the managements and stakeholders of both entities, including the principal shareholder, ICRA understands that PFC and REC remain important vehicles for the implementation of the Gol's various power sector schemes, and support, if needed, will be forthcoming from the Gol. Support to REC, if required, will be extended by the Gol through PFC. This provides comfort as the Gol's stake in PFC is limited at ~56%, which constrains the company's ability to raise capital from non-Government sources without diluting the Gol's shareholding, unless the Gol participates in such capital-raising programmes.

**High concentration risk and portfolio vulnerability** – PFC's exposure to a single sector (i.e. power), the large ticket size of loans, high concentration of exposure towards financially weak state power utilities and the vulnerability of its exposure to private sector borrowers (17% and 15% of the loan book as on December 31, 2019, at the standalone and consolidated level, respectively) increase its portfolio vulnerability. The risk is further heightened as PFC and REC are exempt<sup>2</sup> from the concentration norms applicable to non-banking financial companies (NBFCs), and thus have relatively concentrated exposures. PFC's independent power producer (IPP) portfolio remains impacted by concerns regarding fuel availability, disputed and competitive power sale tariffs, absence of power purchase agreements (PPAs), environmental clearance and land acquisition issues.

PFC's gross stage 3 assets as of December 31, 2019 stood at 8.3% and 7.4% of total advances at the standalone and consolidated level, respectively. With provision covers of 53% and 52%, respectively, at the standalone and consolidated level, the net stage 3 assets as of December 31, 2019 stood at 4.1% and 3.7% of total advances at the standalone and consolidated level, respectively. Over 50% of the consolidated private sector book is recognised as a part of the Stage III assets on which the company has made provisions of 52%. It might have to create additional provisions if it is unable to

<sup>2</sup> Exemption available in case of lending to state government entities

effectively resolve the stressed assets. ICRA, however, believes that any incremental stress in the loan book is likely to be restricted to the private sector book, wherein most of the stressed loans are already in Stage III. Going forward, the company's ability to grow its loan book, while controlling the credit costs and maintaining profitability, would be imperative.

### Liquidity position: Adequate

PFC's asset liability maturity (ALM) profile is characterised by cumulative negative mismatches in the up to one-year buckets (~6% of the total assets as of March 2019, considering principal amounts only), given the relatively long tenure of the loans extended by it. While these gaps can be partially bridged through sizeable unutilised bank lines (about Rs. 5,300 crore as of March 12, 2020), the company also relies on interest income and refinancing to repay its maturing debt. ICRA notes that the cumulative negative mismatches, considering both principal and interest amounts, in the up to one-year buckets are relatively lower though still sizeable (~1.7% and 3.5% of the loans assets as of December 2019 and March 2019, respectively). Also, the gaps could widen if the entity permits the underlying borrowers to defer repayments by three months, in line with the RBI's latest directions. However, the healthy financial flexibility, supported by the sovereign ownership and the ability to raise funds at short notice, provides comfort.

### Rating sensitivities

**Positive triggers** – Not applicable

**Negative triggers** – ICRA could change the rating outlook to Negative or downgrade the ratings on a change in ownership and/or a change in PFC's strategic role or importance to the GoI. Also, a deterioration in the consolidated solvency (Net Stage III/Tier I Capital) of PFC and REC, to a level above 40% on a sustained basis, will be a negative for the credit profile.

### Analytical approach

Analytical Approach	Comments
Applicable Rating Methodologies	<a href="#">ICRA's Credit Rating Methodology for Non-Banking Finance Companies</a> <a href="#">Impact of Parent or Group Support on an Issuer's Credit Rating</a>
Parent/Group Support	The ratings derive strength from PFC's majority ownership by the GoI (56% as on December 31, 2019) and its important role as a nodal agency for various power sector schemes of the Government. The GoI ownership supports PFC's financial flexibility.
Consolidation/Standalone	Consolidation

### About the company

PFC, incorporated in 1986, is a non-banking financial company (NBFC) with infrastructure finance company status. It was set up by the Government of India (GoI) as a specialised development financial institution to fund projects in the domestic power sector. The GoI held a 56% stake in the company as on December 31, 2019.

PFC provides loans for a range of power sector activities including generation, distribution, transmission, and plant renovation and maintenance. It finances state sector entities including generating and distribution companies as well as IPPs. PFC is also the nodal agency for the development of Ultra Mega Power Projects (UMPPs) and the Integrated Power Development Scheme (IPDS) and the bid process coordinator for the Independent Transmission Projects (ITP) Scheme.

PFC is the promoter and holding company of REC Limited. In March 2019, it acquired 103.94-crore equity shares of REC from the President of India constituting 52.63% of the paid-up share capital of REC. The cash purchase consideration for the transaction was Rs. 139.50 per share, implying a total acquisition cost of ~Rs. 14,500 crore.

PFC, on a standalone basis, reported a profit after tax (PAT) of Rs. 6,953 crore in FY2019 compared to PAT of Rs. 4,387 crore in FY2018. Subsequently, in 9M FY2020, it achieved a PAT of Rs. 4,220 crore compared to Rs. 4,835 crore in 9M FY2019. As of December 31, 2019, its reported capital adequacy was 19.3% with Tier I of 14.4% (CRAR and Tier I stood at 17.1% and 11.7%, respectively, as of March 31, 2019), and it had a total loan book of Rs. 3,32,962 crore (Rs. 3,14,667 crore as of March 31, 2019). PFC's exposure to state power utilities and Central and joint sector entities accounts for 83% of its total advances.

At the consolidated level, PFC achieved a PAT of Rs. 8,784 crore in 9M FY2020 (Rs. 9,249 crore in 9M FY2019), following the PAT of Rs. 12,640 crore reported in FY2019. As of December 31, 2019, its reported capital adequacy was 18.1% (16.8% as on March 31, 2019), and it had a total loan book of Rs. 6,40,387 crore (Rs. 5,96,142 crore as on March 31, 2019).

ICRA ratings should not be treated as recommendation to buy, sell or hold the rated debt instruments. ICRA ratings are subject to a process of surveillance, which may lead to revision in ratings. An ICRA rating is a symbolic indicator of ICRA's current opinion on the relative capability of the issuer concerned to timely service debts and obligations, with reference to the instrument rated. Please visit our website [www.icra.in](http://www.icra.in) or contact any ICRA office for the latest information on ICRA ratings outstanding. All information contained herein has been obtained by ICRA from sources believed by it to be accurate and reliable, including the rated issuer. ICRA however has not conducted any audit of the rated issuer or of the information provided by it. While reasonable care has been taken to ensure that the information herein is true, such information is provided 'as is' without any warranty of any kind, and ICRA in particular, makes no representation or warranty, express or implied, as to the accuracy, timeliness or completeness of any such information. Also, ICRA or any of its group companies may have provided services other than rating to the issuer rated. All information contained herein must be construed solely as statements of opinion, and ICRA shall not be liable for any losses incurred by users from any use of this publication or its contents
