### Rationale and key rating drivers

ICRA has assigned an [ICRA]AAAmfs rating to Edelweiss Banking and PSU Debt Fund and an [ICRA]A1+mfs rating to Edelweiss Overnight Fund of Edelweiss Asset Management Limited (EAML). The ratings have been assigned following ICRA's monitoring of the credit risk profile of the month-end portfolio position of the mutual fund (MF) schemes. The ratings are based on their respective portfolios, with the credit score being comfortable at the assigned rating level for both schemes.

MF ratings incorporate ICRA's assessment of the creditworthiness of a debt MF scheme's investment portfolio. These ratings are a symbolic representation of the credit risk in the underlying investments or the degree of safety regarding the timely receipt of payments from the investments made by the MF schemes. The ratings do not indicate the asset management company's (AMC) and/or any of its scheme's willingness and/or ability to make timely redemptions to its investors. The ratings do not address market risks and hence should not be construed as an indication of the expected returns, prospective performance of the MF scheme, and the ability to redeem investments at the reported net asset value (NAV) or volatility in its past returns, as all these are influenced by market risks.

ICRA's assessment of debt MF schemes is guided by the credit ratings of the individual investments and the relative share of the schemes' allocation towards the investments, besides the maturity schedule of such investments. ICRA's MF ratings are not a reflection on the quality of the management of the AMC or its financial performance, reputation and other business practices including investment strategies, pricing, marketing and distribution activities. Furthermore, the ratings are not a reflection of whether the AMC or the fund is compliant with the applicable regulatory requirements.

The credit matrix is a tool used by ICRA for analysing the investment portfolio of the debt MF schemes by assessing the portfolio's aggregate credit quality while reviewing the credit quality of each underlying debt security. The portfolio's weighted average credit quality is compared with a benchmark credit score corresponding to the higher of the weighted average maturity of the scheme's portfolio or the maturity predefined by ICRA for the scheme category. The rating outcome corresponds to the rating level for which the portfolio's weighted average credit score is less than the benchmark credit score associated with the rating level. Further, the lowest rating of the investments of the scheme acts as the floor for its rating.

Once an MF scheme is rated and the rating is accepted, ICRA reviews the underlying investment portfolios for the credit scores on an ongoing basis. To this end, ICRA relies on the information provided by the AMC and/or publicly available sources. ICRA reviews the MF ratings on a monthly basis or earlier, if required, which involves an evaluation of the rating corresponding to the portfolio credit score in relation to the existing rating outstanding. If the portfolio credit score meets the benchmark score for the existing rating, the rating is retained. If the portfolio credit score has a negative breach from the benchmark credit

score for the existing rating, ICRA communicates the same to the fund manager/product manager and or other officials of the concerned AMC before the end of the next month and provides 30 working days from the date of such communication to bring the portfolio credit score within the benchmark credit score for maintaining the existing rating level. If the investment composition of the fund is realigned to bring the portfolio credit score within the benchmark credit score, the rating is retained. However, if the portfolio continues to breach the benchmark credit score for the existing rating level, the rating is revised to reflect the change in the portfolio’s credit quality.

In case of sharp breaches of the benchmark credit score (for instance, due to a multi-notch downgrade in the underlying investment) and/or if ICRA believes that the breach may not get rectified within the prescribed 30 working days, the rating is generally corrected immediately without giving the aforementioned time for rebalancing the portfolio. If the AMC corrects its portfolio, post the rating downgrade of the scheme, or the credit score improves in any manner subsequent to the downgrade, making the scheme eligible for an upgrade, ICRA may consider a rating upgrade only if the credit score is maintained consistently for a period of at least three months.

### Liquidity position: Not applicable

### Rating sensitivities

**Positive factors** – Not applicable

**Negative factors** – ICRA could downgrade the ratings of the schemes if the credit quality of the underlying investment deteriorates or the size of the assets under management (AUM) declines, which may result in an increase in the share of lower rated investments, leading to a breach in the threshold for the rating level.
