

July 03, 2026

Spandana Sphoorty Financial Limited: Provisional [ICRA]AA+(SO) assigned to PTC Series A1(a) and Provisional [ICRA]AA(SO) assigned to PTC Series A1(b) issued by Olive 05 2026, backed by a pool of microfinance loans

Summary of rating action

Trust name	Instrument*	Rated amount (Rs. crore)	Rating action
Olive 05 2026	PTC Series A1(a)	10.35	Provisional [ICRA]AA+(SO); assigned
	PTC Series A1(b)	170.76	Provisional [ICRA]AA(SO); assigned

*Instrument details are provided in Annexure II

Rating in the absence of pending actions/documents	No ratings would have been assigned as it would not be meaningful
--	---

Rationale

The pass-through certificates (PTCs) are backed by a pool of microfinance loan receivables originated by Spandana Sphoorty Financial Limited (SSFL/Originator; rated [ICRA]BBB+(Stable))¹ with an aggregate principal outstanding of Rs. 206.99 crore (pool receivables of Rs. 252.46 crore). SSFL would be acting as the servicer for the transaction.

The provisional ratings are based on the strength of the cash flows from the selected pool of contracts, the credit enhancement available in the structure as well as the integrity of the legal structure. The provisional ratings are subject to the fulfilment of all the conditions under the structure and ICRA's review of the documentation pertaining to the transaction.

Transaction structure

As per the transaction structure, the monthly cash flow schedule comprises the promised interest payout to PTC Series A1(a) and PTC Series A1(b). The principal is expected to be paid on a monthly basis (100% of the pool principal billed) to PTC Series A1(a) but is promised on the final maturity date. Post the maturity of PTC Series A1(a), collections would be passed on to meet expected principal payouts to PTC Series A1(b). The entire principal repayment to PTC Series A1(b) is promised on the scheduled maturity date. The excess interest spread (EIS) available after meeting the expected and promised PTC payments would pass first to PTC Series A1(a) till live and then to PTC Series A1(b). All prepayments would pass first to PTC Series A1(a) till live and then to PTC Series A1(b). The final maturity date for PTC Series A1(a) is October 21, 2028 and for PTC Series A1(b) is October 22, 2028 respectively.

The credit enhancement available in the structure is in the form of (i) a cash collateral (CC) of 7.00% of the initial pool principal, amounting to Rs. 14.49 crore, to be provided by the Originator, (ii) principal subordination of 95.00% of the pool principal for PTC Series A1(a) and 12.50% for the PTC Series A1(b) and (iii) the excess interest spread (EIS) of 17.06% of the pool principal for PTC Series A1(a) and PTC Series A1(b).

¹ The current rating rationale of the originator, available at this [link](#), provides its detailed rating history and rating transitions.

Key rating drivers and their description

Credit strengths

Granular pool supported by presence of credit enhancement – The pool is granular, consisting of 40,741 contracts, with no contract exceeding 0.01% of the pool principal, thereby reducing the exposure to any single borrower. Further, the credit enhancement available in the form of the CC, subordination and EIS would absorb some amount of the losses in the pool and provide support in meeting the PTC payouts.

No overdue contracts in the pool- The pool has been filtered in such a manner that there are no overdue contracts.

Seasoned contracts in the pool – The pool has amortised by almost ~17.1% as on the cut-off date with no delinquencies seen in any of the contracts, post loan disbursement, thereby reflecting the borrowers' relatively better credit profile.

Adequate servicing capability of the originator – The originator has adequate processes for servicing of the loan accounts in the securitised pool. It has a demonstrated track record of over a decade of regular collections across multiple geographies.

Credit challenges

High geographical concentration-The pool has high geographical concentration with the top 3 states, viz. Bihar, Madhya Pradesh and Odisha contributing ~55% to the initial pool principal amount. The pool's performance would thus be exposed to any state-wide disruption that may occur due to natural calamities, political events, etc. Nonetheless, the contracts are well-diversified across multiple districts with the top 10 districts constituting ~19% of the initial pool amount, which alleviates the concentration risk to some extent.

Risks associated with lending business – The pool performance would remain exposed to macro-economic shocks, business disruptions and natural calamities that may impact the income-generating capability of the borrowers and their ability to make timely repayments of their loans. The performance of microfinance loans would also be exposed to political and communal risks.

Higher delinquencies in microfinance sector – The microfinance sector has seen lower collections and elevated delinquencies on account of borrower overleveraging and attrition in collection teams. However, portfolio collections have been improving and are higher from the post guardrail book which is a source of comfort.

Key rating assumptions

ICRA's cash flow modelling for rating securitisation transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The assumptions for the losses and the coefficient of variation are considered on the basis of the values observed from the analysis of the past performance of the Originator's loan portfolio as well as the characteristics of the specific pool being evaluated. The resulting collections from the pool, after incorporating the impact of the losses and prepayments, are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction.

For the current pool, ICRA has estimated the shortfall in the pool principal collection during its tenure at 4.75% of the pool principal with certain variability around it. The average prepayment rate for the underlying pool is modelled in the range of 3% to 9% per annum. Various possible scenarios have been simulated at stressed loss levels and prepayment rates and the incidences of default to the investor as well as the extent of losses are measured after factoring in the credit enhancement to arrive at the final rating for the instrument.

Liquidity position

PTC Series A1(a): Superior

The liquidity is superior for PTC Series A1(a) as CC fully covers future PTC payouts.

PTC Series A1(b): Superior

The liquidity for the PTC Series A1(b) instrument in the transaction is superior after factoring in the credit enhancement available to meet the promised payouts to the investors. The total credit enhancement for PTC Series A1(a) is 6.75 times the estimated loss in the pool.

Rating sensitivities

PTC Series A1(a)

Positive factors/Negative actors – The rating is unlikely to be revised given the CC covers the future PTC payouts.

PTC Series A1(b)

Positive factors – The sustained strong collection performance of the underlying pool of contracts (monthly collection efficiency >95%), leading to lower-than-expected delinquency levels, and an increase in the cover available for future investor payouts from the credit enhancement would result in a rating upgrade.

Negative factors – The sustained weak collection performance of the underlying pool (monthly collection efficiency <90%), leading to higher-than-expected delinquency levels and higher credit enhancement utilisation levels, would result in a rating downgrade. Weakening in the credit profile of the servicer (Spandana) could also exert pressure on the rating.

Analytical approach

The rating action is based on the analysis of the performance of SSFL's microfinance loan portfolio till March 2026, the key characteristics and composition of the current pool, the performance expected over the balance tenure of the pool, and the credit enhancement cover available in the transaction.

Analytical Approach	
Applicable rating methodologies	Rating Methodology for Securitisation Transactions
Parent/Group support	Not Applicable
Consolidation/Standalone	Not Applicable

Pending actions/documents required to be completed for conversion of the provisional rating into final

The assigned rating is provisional and would be converted into final upon the execution of:

1. Trust deed
2. Assignment agreement
3. Power of Attorney
4. Legal opinion
5. Trustee letter
6. Other key or important documents executed for the transaction

Validity of the provisional rating

The Trust is expected to complete the pending actions/execute the pending documents in the near term. However, in case of continued pendency of the actions/documents beyond one year of this publication, the provisional rating would be withdrawn for the transaction even if the instrument has been issued.

Risks associated with the provisional rating

In case the issuance is completed, but the pending actions/documents are not completed for the transaction within one year (validity period) from the assignment of the rating, the provisional rating will be withdrawn in accordance with ICRA's Policy on Provisional Ratings available at www.icra.in.

About the originator

Spandana Sphoorty Financial Limited was incorporated in 2003 as an NBFC. It took over the microfinance operations of Spandana, a non-governmental organisation started by Ms. Padmaja Reddy in 1998. The company was classified as an NBFC-MFI in 2015. Following the microfinance crisis in Andhra Pradesh, the company entered into a master restructuring agreement (MRA) as part of the corporate debt restructuring (CDR) with its lenders in September 2011. It exited the CDR in April 2017 after an equity investment led by Kedaara Capital Investment Managers Limited (Kedaara Capital) and fresh funding from banks. SSFL completed its initial public offering (IPO) in August 2019.

Annexure I: Disclosure pursuant to the SEBI Circular SEBI/HO/DDHS/DDHS-PoD-2/I/4685/2026 dated February 10,2026

ICRA rated Instruments fall under regulatory purview of various Financial Sector Regulators (FSR) as under :

Sr. No.	Instrument	FSR
1	Listed/Proposed to be listed Bonds/Debentures/Preference Shares (all securities)	SEBI
2	Unlisted/Proposed to be unlisted Bonds/Debentures/ Preference share (all securities)	MCA
3	Listed PTCs / Securitisation Notes (originated by entities regulated by RBI) (*)	SEBI
4	Listed PTCs / Securitisation Notes (originated by entities not regulated by RBI) (*)	SEBI
5	Unlisted PTCs / Securitisation Notes (originated by entities regulated by RBI) (*)	RBI
6	Listed Commercial Paper and NCDs with original maturity less than 1 year	RBI
7	Unlisted Commercial Paper and NCDs with original maturity less than 1 year	RBI
8	Loan Facilities (Fund/Non-Fund Based) from Bank / NBFCs/ NHB/ FIs (\$)	RBI
9	External Commercial Borrowings/Loans from overseas branches of Indian Banks/other similar borrowings	RBI
10	Certificates of Deposit	RBI

11	Fixed Deposits raised by NBFCs, Banks, HFCs, FIs	RBI
12	Fixed Deposits raised by corporates other than NBFCs, Banks, HFCs, FIs	MCA
13	Inter Corporate Deposits/Loans extended by Corporates	MCA
14	Listed Security Receipts	SEBI
15	Unlisted Security Receipts	RBI
16	Unlisted PTCs / Securitisation Notes (originated by entities not regulated by RBI) (*)	Investor-side Regulator such as IRDAI, PFRDA (%)

(*) Includes securitisation transactions involving assignee payout, acquirer's payout.

(\$) Includes bank facilities such as liquidity facility, second loss facility that are part of securitisation transactions.

(%) These ratings were assigned prior to the introduction of SEBI CRA Circular dated Feb 10, 2026 and accordingly, investor side FSRs have been mentioned.

Other Activities offered by ICRA fall under regulatory purview of various Financial Sector Regulators (FSR) as under :

Sr. No.	Activity Name	FSR
1	Credit Ratings for Capital Protection Oriented Schemes (by Mutual Funds and AIFs)	SEBI
2	Credit quality ratings (CQRs) for Mutual Fund Schemes and Schemes of AIFs	SEBI
3	Independent Credit Evaluation (ICE)	RBI
4	Expected Loss Ratings (For Loan Facilities [Fund/Non-Fund based] from Banks/NBFCs/NHB/FIs)	RBI
5	Expected Loss Ratings (Listed / Proposed to be listed Bonds / Debentures / Preference Shares (all securities))	SEBI
6	Expected Loss Ratings (Unlisted / Proposed to be unlisted Bonds/ Debentures / Preference Shares (all securities))	MCA
7	Credit Rating of Borrowing programme	(@)
8	Issuer Ratings	(#)
9	Monitoring Agency	SEBI
10	Research activities, incidental to rating such as research for Economy & Industries (permitted by SEBI vide SEBI Master Circular for CRAs)	NA

(@) The rated instrument may involve issuance of different instruments such as debt securities (listed or otherwise), bank loans, commercial paper (listed or otherwise), etc. The regulator of the instrument can only be determined upon issuance. Accordingly, ICRA shall capture the rated quantum details along with names of respective FSR in the press release(s) after the issuance(s) of the instruments.

(#) Since no instrument is being rated, FSR is not applicable. The rating scale and definitions stipulated in SEBI Master Circular for CRAs are being followed.

Disclosure : SEBI's grievance redressal/dispute resolution and SEBI investor protection mechanisms such as SCORES and ODR shall not be available for activities and instruments which fall under the regulatory purview of Financial Sector Regulators other than SEBI.

Complexity level of the rated instrument

Instrument	Complexity Indicator
PTC Series A1(a)	Highly Complex
PTC Series A1(b)	Highly Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [click here](#)
