The long-term rating of [ICRA]A- (pronounced ICRA A minus) has been assigned to the Rs. 48.00 crore cash-credit facility and the Rs. 32.00 crore EPC/PCFC facility (sublimit of cash credit facility) of Lincoln Pharmaceuticals Limited (LPL)<sup>†</sup>. The long term rating of [ICRA]A- has also been assigned to the Rs. 10.00 crore proposed term loan facility of LPL. The outlook on the long-term rating is 'Stable'. The short-term rating of [ICRA]A2+ (pronounced ICRA A two plus) has also been assigned to the Rs. 3.00 crore short-term fund based facilities and the Rs. 14.00 crore short term non-fund based facilities of LPL.

For arriving at the ratings, ICRA has combined the business and financial risk profiles of Lincoln Pharmaceuticals Limited (LPL) and Lincoln Parenteral Limited (LPPL) as LPPL is a subsidiary of LPL (current holding 98.58%) and both entities are owned and managed by the same promoters and are engaged in related lines of business.

The assigned ratings reflect the long standing experience of the promoters and established track record of Lincoln Group in the pharmaceutical formulations industry spanning more than three decades, their established business relations with customers and the healthy growth in operating income since FY 2013 owing to regular launches of new products/variants as well as its extensive marketing network. The ratings favourably factor in the healthy growth in exports especially to semi-regulated markets and the geographic diversification of operations with the group's presence in more than 20 states in domestic markets. ICRA also notes the comfortable financial profile of the group characterized by low gearing and healthy debt protection indicators. The ratings also consider the favourable growth prospects in the long term with diversification into Beta-lactam product categories following completion of planned capex in FY 2017-18.

The assigned ratings are, however, constrained by the vulnerability of operations to changes in the Government policies related to price control as well as the highly competitive domestic generic formulations industry which limits the group's pricing flexibility although ICRA notes that the group's profitability has improved over the last five years owing to successful product launches. Further, growth in export markets is dependent on timely product and facility approvals in the various semi-regulated markets in which Lincoln Group operates. The ratings also consider the high working capital intensity of the group owing to the long credit period extended to customers especially in the export markets.
