Reliance Industries Limited

Reliance Industries Limited has announced its quarterly results on July 20, 2017.

During Q1 FY2018, the company, on a consolidated basis, has reported a Profit After Tax (PAT) of Rs 9108 crore (28% higher YoY) on an operating income of Rs 90,537 crore (26.7% higher YoY) supported by healthy performance in the petrochemicals and refining businesses. ICRA notes that the results are broadly in line with expectations.

ICRA currently has outstanding ratings of [ICRA]A1+ on the Commercial Paper programme of RIL. The rating continues to derive comfort from the robust financial risk profile of the company reflected by comfortable gearing levels, strong coverage indicators and low working capital intensity along with overall healthy cash generation supported mainly by the refinery and petrochemical segments and high non-operating income. The rating also factors in the company's high financial flexibility derived from its healthy liquid investment portfolio apart from sizeable treasury shares and superior fund raising ability from the domestic and global banking as well as capital markets.

ICRA also notes that RIL has made large investments in its telecom business where there has been a healthy increase in customer base during its first year of commercial operations. Further, ICRA factors in the sensitivity of the company's profits and cash generation to refining and petrochemical margin cycle, and risks associated with the E&P business such as geological risk, lack of diversity in production blocks and moderate reserve replacement track record.
