ICICI Bank Limited

Summary of rated instruments

Instrument*	Rated Amount (Rs. crore)	Rating Action
Basel III Complaint Tier I Bonds Programme	10,000	[ICRA]AA+(hyb)(stable); assigned

*Instrument details are provided in Annexure-1

Rating action

ICRA has assigned a rating of [ICRA]AA+(hyb)(stable) (pronounced ICRA double A plus hybrid with a stable outlook) to the Rs. 10,000 crore Basel III compliant Tier I bonds programme of ICICI Bank Limited (IBL)¹.

The letters “hyb” in parenthesis suffixed to a rating symbol stand for “hybrid”, indicating that the rated instrument is a hybrid subordinated instrument with equity-like loss-absorption features; such features may translate into higher levels of rating transition and loss severity vis-à-vis conventional debt instruments.

ICRA has the rating of [ICRA]AAA (pronounced ICRA triple A) outstanding for the Rs. 22,000 crore Lower Tier II bonds programme and the Rs. 35,000 crore unsecured redeemable long term bonds programme of IBL. ICRA also has the rating of [ICRA]AAA outstanding for the debt taken over by IBL from the erstwhile ICICI Limited and erstwhile The Bank of Rajasthan Limited (long term bonds of Rs. 1,036 crore and sub debt of Rs. 137 crore). ICRA also has a rating of [ICRA]AA+(hyb) (pronounced ICRA triple A hybrid) outstanding for the Rs. 3,500 crore Basel III compliant tier I bonds programme of IBL. Further, ICRA also has ratings of MAAA (pronounced M triple A) outstanding for the term deposit programme and [ICRA]A1+ (pronounced ICRA A one plus) for the Rs. 50,000 crore certificates of deposit programme of IBL. The outlook on the long term and medium term ratings is stable.

The rating for the Basel III compliant Tier I bonds is one notch lower than the unsecured redeemable long term bonds of the bank as these instruments have the following loss absorption features that make them riskier.

- The bank has the discretion at all times to cancel distribution and payments; cancellation of discretionary payments shall not be an event of default.
- The minimum capital conservation ratio applicable to the banks may restrict the bank from servicing these Tier I bonds in case the Common Equity Tier I (CET I) falls below the limit prescribed by the Reserve Bank of India (RBI).

These Tier I bonds are expected to absorb losses through the write-down mechanism at the objective pre-specified trigger point fixed at the bank’s (CET I) ratio as prescribed by the RBI, of 5.5% till March 2019 and thereafter 6.125% of total risk weighted assets of the bank or when the “point of non-viability” trigger is breached in the RBI’s opinion.

Basel III compliant Tier I bonds also have the following features, which makes them riskier.

- Coupon payments are non-cumulative and discretionary; the bank has the full discretion at all times to cancel coupon payments.

¹ For complete rating scale and definitions, please refer to ICRA’s website (www.icra.in) or other ICRA rating publications.

- Coupon can be paid out of current year profits. However, if the current year profit is not sufficient, or, if the payment of coupon is likely to result in a loss, the coupon payment can be done through reserves and surpluses created through appropriation of profits (including statutory reserves). However, the coupon payment is subject to the bank meeting the minimum regulatory requirements for CET I, Tier I and total capital ratios (including capital conservation buffer, CCB) at all times as prescribed by the RBI under Basel III regulations.

Rationale

Given the above distinguishing features of the Basel III compliant Tier I bonds, ICRA has assigned a one notch lower rating on these bonds than the rating on the Tier II instruments. The bank's distributable reserves² that can be used for servicing the coupon in a situation of inadequate profits or a loss during the year, stood at a comfortable 10.4% of risk weighted assets as on June 30, 2017 (9.9% as on March 31, 2017 and 7.7% as on March 31, 2016).

The ratings are supported by IBL's strong position in the Indian financial system with a 6.0% share in banking sector advances as on March 31, 2017, its sound capitalisation levels (CRAR: 17.89%; CET I capital of 14.17% and Tier I capital: 14.80% as on June 30, 2017), healthy resource profile (CASA of 49.0% as on June 30, 2017) and retail franchise (4,852 branches and 13,780 ATMs as on June 30, 2017). The bank's slippages increased during FY2017 (with fresh NPA generation rate of ~7.9% during FY2017 and ~4.5% annualised in Q1FY2018). The value creation in its subsidiaries and the ability to monetize its investments support internal capital generation. In light of the bank's exposure to stressed sectors (11.7% of total exposure as on June 30, 2017), the pace of fresh NPA generation and recoveries from the existing stock of stressed advances would be key monitorables.

Key rating drivers

Credit strengths

- **Established track record and strong market position in the financial services sector** – The bank had a loan book of Rs. 464,232 crore as on March 31, 2017 with a market share of 6.0% in banking sector advances. While the bank reported a domestic growth of 10.9% (YoY) during Q1FY2018, its overall growth in advances was moderate at 3.3% on account of a degrowth in overseas advances by ~25.0% (largely following FCNR (B) redemptions). Consequently, IBL's loan book stood at Rs. 464,075 crore as on June 30, 2017 (Rs. 464,232 crore as on March 31, 2017 and Rs. 435,264 crore as on March 31, 2016). As on June 30, 2017, wholesale advances constituted 26.8% of the bank's overall advances, retail advances constituted 53.3%, overseas advances constituted 15.4% and the SME advances accounted for 4.5%. ICRA expects a credit growth of 10-12% for IBL during FY2018 which will be higher than the estimated industry growth of 7-8%.
- **Healthy resource profile with a large share of CASA deposits** – IBL's CASA ratio remains one of the highest in its peer group and a significant credit positive in light of the granularity in the depositor base and the lower cost of borrowings. The bank's top 20 deposits stood at only 7.03% of the total deposits as on March 31, 2017 (7.35% as on March 31, 2016). Supported by demonetisation, IBL's CASA ratio improved to 49.0% as on June 30, 2017 from 45.1% as on June 30, 2016 (50.4% as on March 31, 2017). The healthy deposit growth rate of ~14.7% on a YoY basis resulted in the bank's borrowings reducing by ~18.7% during the period. IBL's cost of interest bearing funds stood at 5.3% in FY2017 which is comparable to the private sector bank average. While the cost of interest bearing funds declined further to 5.0% during Q1FY2018, ICRA does not

²Calculated as per the amendment in Basel III capital regulations for AT I bonds by the RBI, vide its circular dated February 2, 2017. As per the amended definition, "distributable reserves" include all reserves created through appropriation from profit and loss account.

expect the ratio to continue to decline materially in the near term, unless the bank reduces its saving deposit rates.

- **Robust capitalisation levels** – IBL’s capitalisation ratios remained strong in comparison to the regulatory requirements with CET1, Tier 1 and CRAR (as % of risk weighted assets) at 14.17%, 14.80%, and 17.89% respectively as on June 30, 2017 (12.94%, 13.02% and 16.45% as on June 30, 2016). With the increase in NPAs, the bank’s solvency weakened with net NPAs/net worth of 25.93% as on June 30, 2017 (16.87% as on June 30, 2016). As per ICRA estimates, the bank is comfortably placed to meet the Basel III capital ratios even in a scenario of growth in RWAs based on past CAGRs. ICRA also expects IBL to maintain a healthy cushion over and above the regulatory capital levels.
- **Sound core profitability supported by high treasury and fee income** - Despite a decline in its yield on advances, the bank’s lower cost of funds resulted in only a marginal decline in its net interest margins (NIMs) to 2.9% of average assets during FY2017 from 3.1% during FY2016. Historically, fee income (transaction based income and forex income) has been a strong source of income for the bank at ~1.45% of average assets. While fee income growth was muted with fee income to ATA at 1.28% during FY2017 and 1.29% during FY2016, this was offset by the gains in treasury income primarily driven by a stake sale in the life insurance subsidiary. In FY2017, with the decline in NIMs and muted fee income growth, IBL’s operating profitability declined to 2.2% of ATA from 2.6% in FY2016. However, the bank’s operating profitability is comparable with peers and private sector banks apart from being better than the banking sector average of 1.6% of ATA during FY2017. With an increase in NPA levels, IBL’s credit costs stood at 2.1% during FY2017 as against 1.7% during FY2016; however, the impact on net profitability was largely offset by the treasury income of 1.3% during FY2017 as against 1.0% during FY2016. Overall, the bank reported PAT to ATA of 1.3% in FY2017 (1.4% in FY2016) and RoE of 10.7% (10.6% in FY2016). Further, with stable NIMs and fee income coupled with higher treasury income and a moderate increase in credit costs, the bank’s PAT to ATA in Q1FY2018 was lower at 1.1% resulting in an RoE of 8.4%. ICRA expects the pressure on profitability to continue in the near term given the pressure on asset quality and consequent credit costs; however, IBL’s operating profits are likely to remain stable and the bank has additional buffers in terms of high capital levels and an ability to monetize its investments.

Credit weaknesses

- **Ability to control credit costs, NPA generation, and improve recoveries from existing gross NPAs given the high exposure to stressed sectors** - The bank reported gross NPAs and net NPAs of 7.99% and 4.86% respectively as on June 30, 2017 (7.89% and 4.89% as on March 31, 2017 and 5.28% and 3.01% as on June 30, 2016) with the sequential increase in gross NPAs moderating during Q1FY2018 on account of upgradations and write-offs. The fresh NPA generation rate remained high at ~7.9% during FY2017 and 4.5% (annualised) during Q1FY2018. Consequently, IBL’s provisioning cover (excluding prudential and technical write-offs) stood at ~41.4% as on June 30, 2017 (40.2% as at March 31, 2017 and 50.6% as at March 31, 2016). With ~2.8% of gross advances as on March 31, 2017 being under various schemes of restructuring and classified as standard, ICRA expects the asset quality pressure to continue for FY2018. The bank had a total exposure of Rs. 7,240 crore towards accounts identified by the RBI for insolvency proceedings against which it had a provision of ~41% as on June 30, 2017.
- **Pressure on NIMs on account of repricing of existing floating rate loans and lower income earning assets** - IBL’s NIMs remained stable on a YoY basis at 2.9% during Q1FY2018 (2.9% during Q1FY2017 and 2.9% during FY2017). In line with the declining interest rates in the economy, the bank’s yield on advances declined to 8.5% during Q1FY2018 (8.9% during Q1FY2017 and 8.8% during FY2017) with a concurrent decline in the cost of funds to 5.0% during Q1FY2018 (5.5% during Q1FY2017 and 5.3% during FY2017). With expectations of a limited

decline in cost of funds going forward, ICRA expects the NIMs to remain under pressure during medium term following the repricing of existing floating rate loans and the lower level of income earning assets on account of slippages. Consequently, despite the expected credit growth, ICRA expects IBL's NII growth to remain moderate because of the pressure on NIMs.

Analytical approach:

For arriving at the ratings, ICRA has applied its rating methodologies as indicated below.

About the company

ICICI Bank Limited (IBL) is a large private sector bank in India with a 6.0% market share of the banking sector advances as on March 31, 2017. With a presence in banking, insurance, asset management, investment banking and private equity, the ICICI group is a large player in the Indian financial system. As at June 30, 2017, the bank had 4,852 branches and 13,780 ATMs. IBL was originally promoted in 1994 by ICICI Limited, an Indian financial institution, and was its wholly-owned subsidiary. In 1998, ICICI Limited's shareholding in IBL reduced to 46% following a public offering of shares. Further in 2002, ICICI Limited and IBL were merged, consequent to which the ICICI group's financing and banking operations, both wholesale and retail, were integrated in a single entity.

For FY2017, IBL reported a net profit of Rs. 9,801 crore on total assets of Rs. 7.69 lakh crore and a regulatory capital adequacy of 17.39% (Tier I of 14.36% and CET I of 13.74%) as on March 31, 2017 as compared with a net profit of Rs. 9,726 crore on total assets of Rs. 7.18 lakh crore and a regulatory capital adequacy of 16.64% (Tier I of 13.09% and CET I of 13.00%) as on March 31, 2016. For Q1FY2018, IBL reported a net profit of Rs. 2,049 crore on total assets of Rs. 7.59 lakh crore and a regulatory capital adequacy of 17.89% (Tier I of 14.80% and CET I of 14.17%) as on June 30, 2017. The bank reported gross NPAs of 7.99% and net NPAs of 4.86% as on June 30, 2017.

About ICRA Limited:

ICRA Limited was set up in 1991 by leading financial/investment institutions, commercial banks and financial services companies as an independent and professional investment Information and Credit Rating Agency.

Today, ICRA and its subsidiaries together form the ICRA Group of Companies (Group ICRA). ICRA is a Public Limited Company, with its shares listed on the Bombay Stock Exchange and the National Stock Exchange. The international Credit Rating Agency Moody's Investors Service is ICRA's largest shareholder.

ICRA ratings should not be treated as recommendation to buy, sell or hold the rated debt instruments. ICRA ratings are subject to a process of surveillance, which may lead to revision in ratings. An ICRA rating is a symbolic indicator of ICRA's current opinion on the relative capability of the issuer concerned to timely service debts and obligations, with reference to the instrument rated. Please visit our website www.icra.in or contact any ICRA office for the latest information on ICRA ratings outstanding. All information contained herein has been obtained by ICRA from sources believed by it to be accurate and reliable, including the rated issuer. ICRA however has not conducted any audit of the rated issuer or of the information provided by it. While reasonable care has been taken to ensure that the information herein is true, such information is provided 'as is' without any warranty of any kind, and ICRA in particular, makes no representation or warranty, express or implied, as to the accuracy, timeliness or completeness of any such information. Also, ICRA or any of its group companies may have provided services other than rating to the issuer rated. All information contained herein must be construed solely as statements of opinion, and ICRA shall not be liable for any losses incurred by users from any use of this publication or its contents.
