

## Shriram Transport Finance Company Limited

June 29, 2018

### Summary of rated instruments

Trust Name	Instrument*	Rated Amount (Rs. crore)	Rating Action
Sansar Trust June 2018 II	PTC Series A	498.86	Provisional [ICRA]AAA(SO) assigned
	Second Loss Facility	23.70	Provisional [ICRA]BBB+(SO) assigned

\*Instrument details are provided in Annexure-1

### Rating action

ICRA has assigned Provisional [ICRA]AAA(SO) [pronounced Provisional ICRA triple A (Structured Obligation)] to PTC Series A and Provisional [ICRA]BBB+(SO) [pronounced Provisional ICRA triple B plus (Structured Obligation)] under a securitization transaction originated by Shriram Transport Finance Company Limited (STFC). The PTCs are backed by receivables from a Rs. 498.86 crore pool of vehicle, construction equipment and tractor loans.

### Rationale

The provisional ratings are based on the strength of cash flows from the selected pool of contracts, STFC's track record in the lending business, the available credit enhancement in the form of credit collateral and subordination of Excess Interest Spread (EIS), and the integrity of the legal structure. The ratings are subject to fulfilment of all conditions under the structure and the review of documentation pertaining to the transaction by ICRA.

### Key rating drivers

#### Credit strengths

- Availability of credit enhancement in the form of EIS and Credit Collateral;
- Moderately high seasoning profile of the pool contracts with average seasoning of ~12 months
- Low obligor concentration with the top 10 obligors together accounting for only ~0.62% of the overall pool principal amount;

#### Credit challenges

- Moderately high average LTV of 75.07%; share of contracts with LTV more than 90% is 8.27%
- Share of overdue contracts is 8.57% of the pool principal; however, none of the contracts is overdue for more than one month
- Share of contracts backed by tractor loans is higher at 8.54% of the overall pool principal

#### Description of key rating drivers highlighted above:

According to the transaction structure, the loan pool receivables will be transferred "at par" to a Special Purpose Vehicle (SPV) and the Trust will issue a single series of PTCs, backed by the same. The first line of support for meeting scheduled PTC payouts is the subordination of EIS in the structure. Further credit support in the transaction is available through a Cash Collateral (CC) of 9.75% of the pool principal amount.

The pool is characterised by moderately high seasoning (average seasoning of 11.59 months) and has an average LTV of around 75.07%. Share of contracts backed by tractor loans in the selected pool is higher at 8.54%. However, none of the contracts is overdue for more than one month. The selected pool consists of receivables from loans given for both new and used vehicles in the Commercial Vehicle (CV; around 71% share in the pool), new and used vehicles in the Passenger Vehicle (PV; around 11% share in the pool), new and used Construction Equipment (CE; around 9% share in the pool), and new and used Tractor (Tractor; 9% share in the pool) asset classes. Share of contracts backed by tractor loans is higher at 8.54% of the overall pool principal. Tractor loans, as an asset class, is considered weaker.

## Key Rating Assumptions

ICRA's cash flow modelling for rating of ABS transactions involves simulation of potential delinquencies, losses (shortfall in principal collection during the tenor of the pool) and prepayments in the pool. The assumptions for loss and the Coefficient of Variation (CoV) are arrived at after taking into account the past performance of the Originator's portfolio and rated pools, and also the characteristics of the specific pool being evaluated. Additionally, the assumptions may be adjusted to factor the current operating environment and any industry specific factors that ICRA believes could impact the performance of the underlying pool contracts.

After making the aforementioned adjustments, the expected mean shortfall in principal collection during the tenure of the pool is estimated to be about 4.0% - 5.0%, with certain variability around it. The prepayment rate for the underlying pool is estimated to be in the range of 8.0% - 12.0% per annum.

**Analytical approach:** The rating action is based on the analysis of the past performance of STFC's portfolio and previously rated ICRA pools, key characteristics and composition of the current pool, performance expected over the balance tenure of the pool, and the credit enhancement cover available in the transaction.
