

Shriram Transport Finance Company Limited

October 17, 2018

Summary of rated instruments

Trust Name	Instrument*	Rated Amount (Rs. crore)	Rating Action
Sansar Trust September 2018 III	PTC Series A	494.61	Provisional [ICRA]AAA(SO) confirmed as final
	Second Loss Facility	19.78	Provisional [ICRA]BBB+(SO) confirmed as final

*Instrument details are provided in Annexure-1

Rating action

ICRA has confirmed the provisional ratings assigned to PTCs and Second Loss Facility issued by Sansar Trust September 2018 III trust as final, as tabulated above. The PTCs are backed by receivables from a Rs. 494.61 crore (Principal outstanding) pool of vehicle and construction equipment receivables originated by Shriram Transport Finance Company Limited (STFC).

Rationale

In September 2018, ICRA had assigned Provisional [ICRA]AAA(SO) and Provisional [ICRA]BBB+(SO) rating to PTC Series A and Second Loss Facility respectively. Since the executed transaction documents are in line with the rating conditions, and the legal opinion for the transaction have been provided to ICRA, the said ratings have now been confirmed as final.

Key rating drivers

Credit strengths

- Availability of credit enhancement in the form of EIS and Credit Collateral;
- Moderate seasoning profile of the pool contracts with average seasoning of ~10 months
- Low obligor concentration with the top 10 obligors together accounting for only ~1.42% of the overall pool principal amount;

Credit challenges

- Moderately high average LTV of 72.56%; share of contracts with LTV more than 90% is 3.77%
- Share of overdue contracts is 3.59% of the pool principal; however, none of the contracts is overdue for more than one month as on pool cut-off date

Description of key rating drivers highlighted above:

According to the transaction structure, the loan pool receivables will be transferred “at par” to a Special Purpose Vehicle (SPV) and the Trust will issue a single series of PTCs, backed by the same. The first line of support for meeting scheduled PTC payouts is the subordination of EIS in the structure. Further credit support in the transaction is available through a Cash Collateral (CC) of 9.00% of the pool principal amount.

The pool is characterised by moderate seasoning (average seasoning of 9.98 months) and has an average original LTV of around 72.56%. Share of overdue contracts is moderate at 3.59% of the pool principal. However, none of the contracts are overdue for more than one month as on the pool cut-off date. The selected pool consists of receivables from loans given for both new and used vehicles in the Commercial Vehicle (CV; around 79% share in the pool) Passenger Vehicle (PV; around 11% share in the pool) and Construction Equipment (CE; around 9% share in the pool) asset classes.

Key Rating Assumptions

ICRA's cash flow modelling for rating of ABS transactions involves simulation of potential delinquencies, losses (shortfall in principal collection during the tenor of the pool) and prepayments in the pool. The assumptions for loss and the Coefficient of Variation (CoV) are arrived at after taking into account the past performance of the Originator's portfolio and rated pools, and also the characteristics of the specific pool being evaluated. Additionally, the assumptions may be adjusted to factor the current operating environment and any industry specific factors that ICRA believes could impact the performance of the underlying pool contracts.

After making the aforementioned adjustments, the expected mean shortfall in principal collection during the tenure of the pool is estimated to be about 4.0% - 5.0%, with certain variability around it. The prepayment rate for the underlying pool is estimated to be in the range of 8.0% - 12.0% per annum.

Analytical approach: The rating action is based on the trustee confirming compliance with the terms of the transaction and the executed transaction documents being in line with the terms initially shared with ICRA.
