Reliance Nippon Life Asset Management Limited: Rating withdrawn for Reliance Capital Protection Oriented Fund I – Plan A and Reliance Capital Protection Oriented Fund I – Plan B

Summary of rating action

Instrument	Previous Rated	Current Rated Amount (Rs. crore)	Rating Action
Reliance Capital Protection Oriented Fund I – Plan A	-	-	Provisional [ICRA]AAAmfs(SO); withdrawn
Reliance Capital Protection Oriented Fund I – Plan B	-	-	Provisional [ICRA]AAAmfs(SO); withdrawn

Rationale and key rating drivers

ICRA's mutual fund rating methodology is based on evaluating the inherent credit quality of the fund's portfolio. As a measure of the credit quality of a debt fund's assets, ICRA uses the concept of "credit scores". These scores are based on ICRA's estimates of the credit risk associated with each exposure of the portfolio, taking into account its maturity. To quantify the credit risk scores, ICRA uses its database of historical default rates for various rating categories and maturity buckets. The credit risk ratings incorporate ICRA's assessment of a debt fund's published investment objectives and policies, its management characteristics, and the creditworthiness of its investment portfolio. ICRA reviews relevant fund information on an ongoing basis to support its published rating opinions. If the portfolio's credit score meets the benchmark of the assigned rating during the review, the rating is retained. In an event that the benchmark credit score is breached, ICRA gives a month's time to the debt fund manager to bring the portfolio credit score within the benchmark credit score. If the debt fund manager is able to reduce the portfolio credit score within the benchmark credit score, the rating is retained. If the portfolio still continues to breach the benchmark credit score, the rating is revised to reflect the change in the credit quality.

The portfolio structure for the capital protection schemes have been designed to protect the unit holders' capital at maturity, which is ensured by investing a majority of the portfolio in debt securities maturing on or before the maturity of the schemes. The schemes will invest in debt securities only with a rating of [ICRA]AAA or equivalent, mitigating any concerns on credit risk. The proportion of debt securities is calculated such that the redemption value of debt less AMC expenses will be equal to or greater than the initial unit holder's capital, offering highest degree of protection of the unit holder's capital at maturity. ICRA has factored in the credit risk of debt investments, reinvestment risk of interim receipts, precondition of marginal tenure mismatches and obligor concentrations. The debt portion would be passively managed. The balance portion would be invested in equity and equity-linked instruments to provide any upside potential to the unit holders. At the same time, given the proportion of high credit quality debt investments and the portfolio structure, the downside is protected and the investor may not suffer loss of initial investment at the time of maturity.

The rating has been withdrawn at the request of company as the said scheme is not yet launched.
